RAD Billiards

About RAD Billiards

RAD Billiards builds The Alyse, an American-made 8 foot carom billiards table, hand built to order in Texas. Carom is played with three balls on a table with no pockets. It is one of the world's great cue sports, yet in the United States almost every carom table is imported. RAD Billiards builds one here, sells it at one published price, and delivers it in 2 to 6 weeks from order.

Our story

RAD Billiards was started to build something lasting: a business, and a table, that a family can hand down. We come from a background in pool tables, and that experience shows in every detail. Every table that leaves our workshop carries the same care: a solid oak cabinet, a three-piece slate bed and a brass nameplate, built to be played for decades.
