About RAD Billiards

RAD Billiards is an American-made, built-to-order carom billiards table company based in Princeton, Texas. Every table is tournament-grade, crafted to order using premium materials and construction standards trusted by serious players and casual enthusiasts alike.

Founder's Story

RAD Billiards was born from something deeper than business ambition. As a single father, Albert Dawson set out not just to build a company, but to build a legacy, something lasting he could hand down through the generations of his family. Every table that leaves the workshop carries that same spirit: care poured into every detail, craftsmanship built to outlast trends, and a name he hopes his children and grandchildren will one day be proud to carry forward. RAD Billiards isn't just about the game. It's about what gets passed down when the game is over.
